NOVARYN BRIDGE CONSULTING GROUP LLC

CAPABILITY STATEMENT

Founder-led healthcare performance consulting · North Texas, serving clients nationwide

703-862-1031 · admin@novarynbridgeconsultinggroup.com · novarynbridgeconsultinggroup.com

CORE COMPETENCIES

- **iQIES readiness and PBJ submission assurance.** Access and role audits, submission dry runs against iQIES validation, and error classification for skilled nursing operators.
- **Quality and regulatory performance.** CMS Five-Star delta analysis, quality-measure gap registers, corrective workflow design, ownership assignment, and monitoring.
- **Healthcare data and analytics.** Metric and source definition, executive and operational dashboards, and interpretation support that drives decisions rather than reports.
- **Clinical workflow and EHR optimization.** Current-state mapping, redundancy and failure-point analysis, future-state design, and adoption planning.
- **Health program operations and execution support.** Implementation, stakeholder alignment, training, measurement, and sustainment.
- **Informatics workforce development.** Precepted, project-based practicums on synthetic data that develop an employed nurse into an informatics role while producing a scoped optimization deliverable.

DIFFERENTIATORS

- **Diagnose before prescribing.** A clinical method applied to consulting: the outcome is defined, the system behind it is traced, and only then is an intervention designed.
- **Clinical fluency with executive discipline.** A registered nurse executive with an MBA and an MSN leads every engagement personally — no junior handoff, no pass-through capacity.
- **Non-clinical by design.** Advisory engagements require no protected health information, no clinical system access, and no business associate agreement, which is why they scope and start in days.
- **Fixed-fee, defined deliverables.** Named artifacts and named dates, not open-ended hours.
- **Substantive small-business workshare.** A 100% woman-owned firm contributing subject-matter work to a prime team.

FOUNDER AND SCOPE OF RESPONSIBILITY

Tessy Edomwandagbon, RN, MBA, MSN — Founder and Managing Member. A registered nurse with graduate preparation in both nursing and business, leading every NBCG engagement directly. No junior handoff, no pass-through capacity.

- **85-bed skilled nursing unit** including a memory care population, directed end to end.
- **57 nursing staff** under direct management across roles and shifts.
- **Annual state survey completed with three nursing tags.**
- **Long-stay quality measures below the national benchmark** for urinary tract infection and antianxiety medication use.

Scope of the founder's responsibility in a prior leadership role — key-personnel experience, not NBCG past performance. Benchmark: national rate, CMS MDS Quality Measures dataset.

ACTIVE ENGAGEMENT

iQIES Readiness & Five-Star Diagnostic

Payroll-Based Journal submission moved from QIES to iQIES on 17 August 2026. The Q4 FY2026 submission is the first made through the new system and is due **14 November 2026, 11:59 PM ET**. There are no extensions, and a missed quarter produces the lowest staffing score rather than a warning.

- iQIES access and role audit per facility
- Q4 FY2026 PBJ submission dry run
- Five-Star threshold delta analysis
- Quality-measure gap register
- Findings memo and remediation roadmap
- Sixty-minute leadership closeout call

NBCG assesses and advises. Client submits. No PHI, no clinical system access, no BAA required.
